

The CEOP Model Data Archive

at WDC-Climate

Outlook to the new CEOP

Frank Toussaint

Michael Lautenschlager, Hans Luthardt, Jörg Wegner

1. What is left ?

- still some raw data to upload and to ingest
- data homogenisation, esp. MOLTS

2. What is next ?

- prepare continuous data flows into the WDC-Climate database
- normalisation of data structures and formats
- bilateral communication with the data providers

3. What else ?

- More quality checks
error information ??
- Link metadata – documentations
- Data gap between phases I + II ?
- Faster internet connections
- Conversion to GRIB to NetCDF

Thank you
