

# Development of Data Integration and Analysis System (DIAS)

**Eiji Ikoma\***, **Masaki Yasukawa\***,

*Hiroko Kinutani\**, *Toshihiro Nemoto\*\**

*and*

*Masaru Kitsuregawa\*\**, **Toshio Koike\***,**\*\*\***

**The University of Tokyo**

\*Earth Observation Data Integration and Fusion Research Initiative, UT

\*\*Institute of Industrial Science, UT

\*\*\*Department of Civil Engineering, UT

# Outline

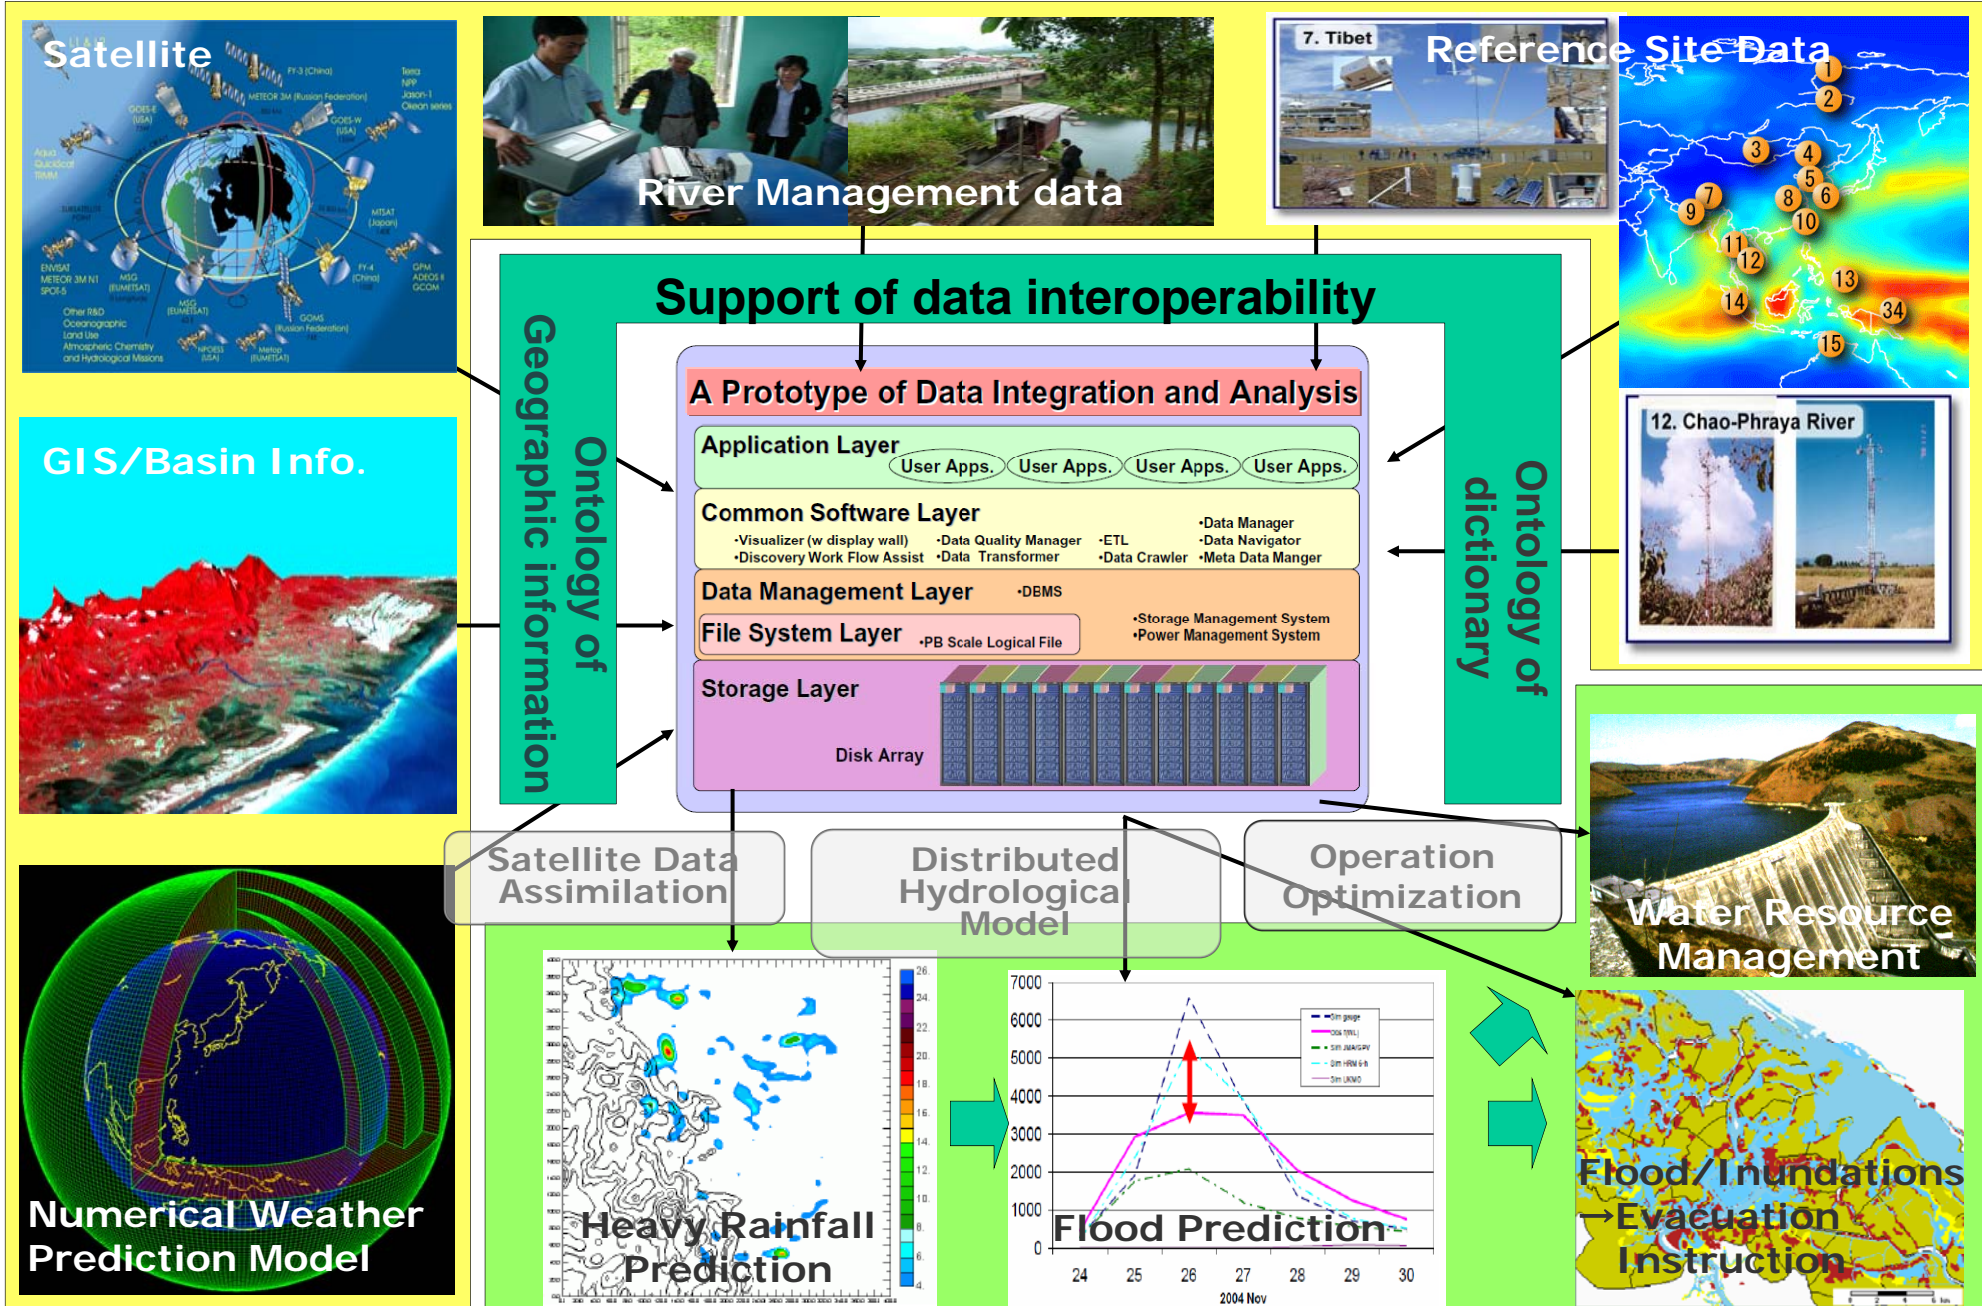

1. Outline of DIAS System
  2. Introduction of Data Upload, Quality Control, and Meta-Data Registration System
- 
3. Introduction of CEOP Satellite Data Gateway system
  4. Applications on DIAS System

# What is DIAS?

- Since 2006, as part of the Earth Observation and Ocean Exploration System, which is one of five National Key Technologies defined by the 3rd Basic Program for Science and Technology of Japan.

# DIAS

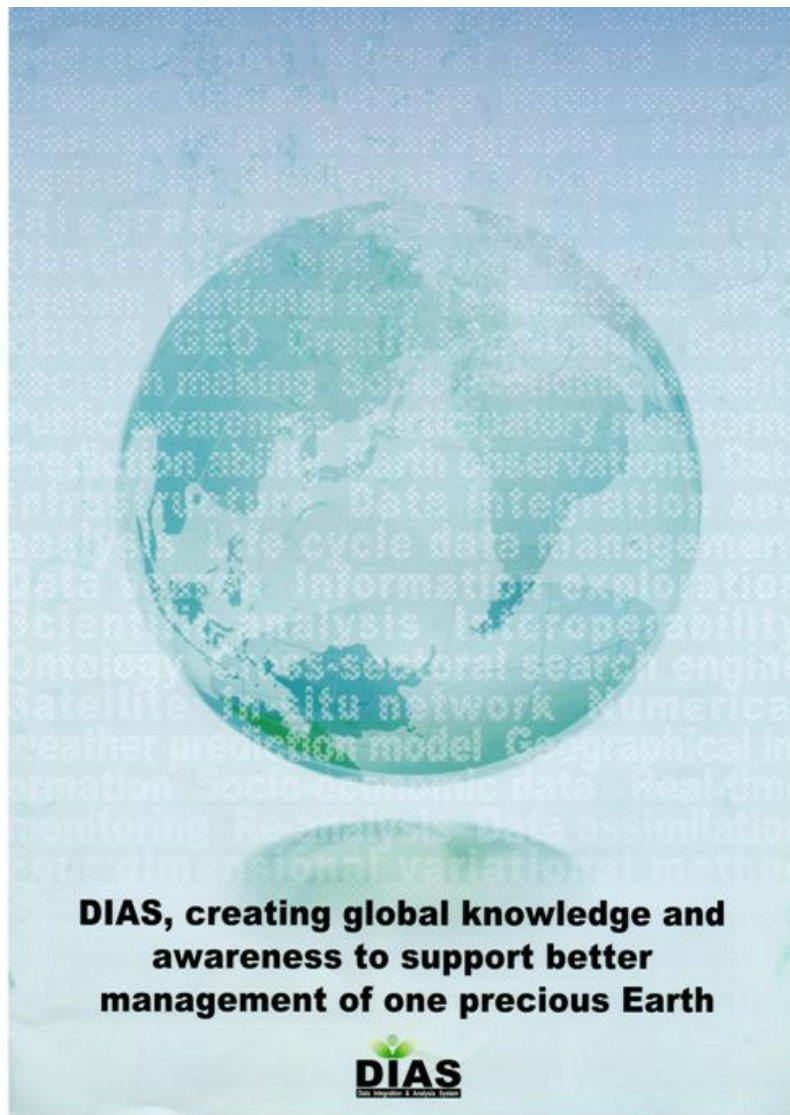

- Cooperation among the Observer, IT and Users -

# The mission of DIAS

- to coordinate the cutting-edge information science and technology and the various research fields addressing the earth environment;
- to construct data infrastructure that can integrate earth observation data, numerical model outputs, and socio-economic data effectively;
- to create knowledge enabling us to solve the earth environment problems; and
- to generate socio-economic benefits.

# In detail about DIAS, Please see

**DIAS, creating global knowledge and awareness to support better management of one precious Earth**

## **DIAS, a legacy for Japan's contributions to GEOSS**

By coordinating the development of earth observation systems, the Global Earth Observation System of Systems (GEOSS) is enabling better decisions and actions for the benefit of society. The GEOSS Ten Year Implementation Plan defined a task:

"To coordinate data management approaches that encompass a broad perspective of the observation data life cycle, from input through processing, archiving, and dissemination, including reprocessing, analysis and visualization of large volumes and diverse type of data".

Japan, as a leader of this task, contributes to GEOSS through the development of the Data Integration and Analysis System (DIAS) and its participation in alliances with data integration centers around the world.

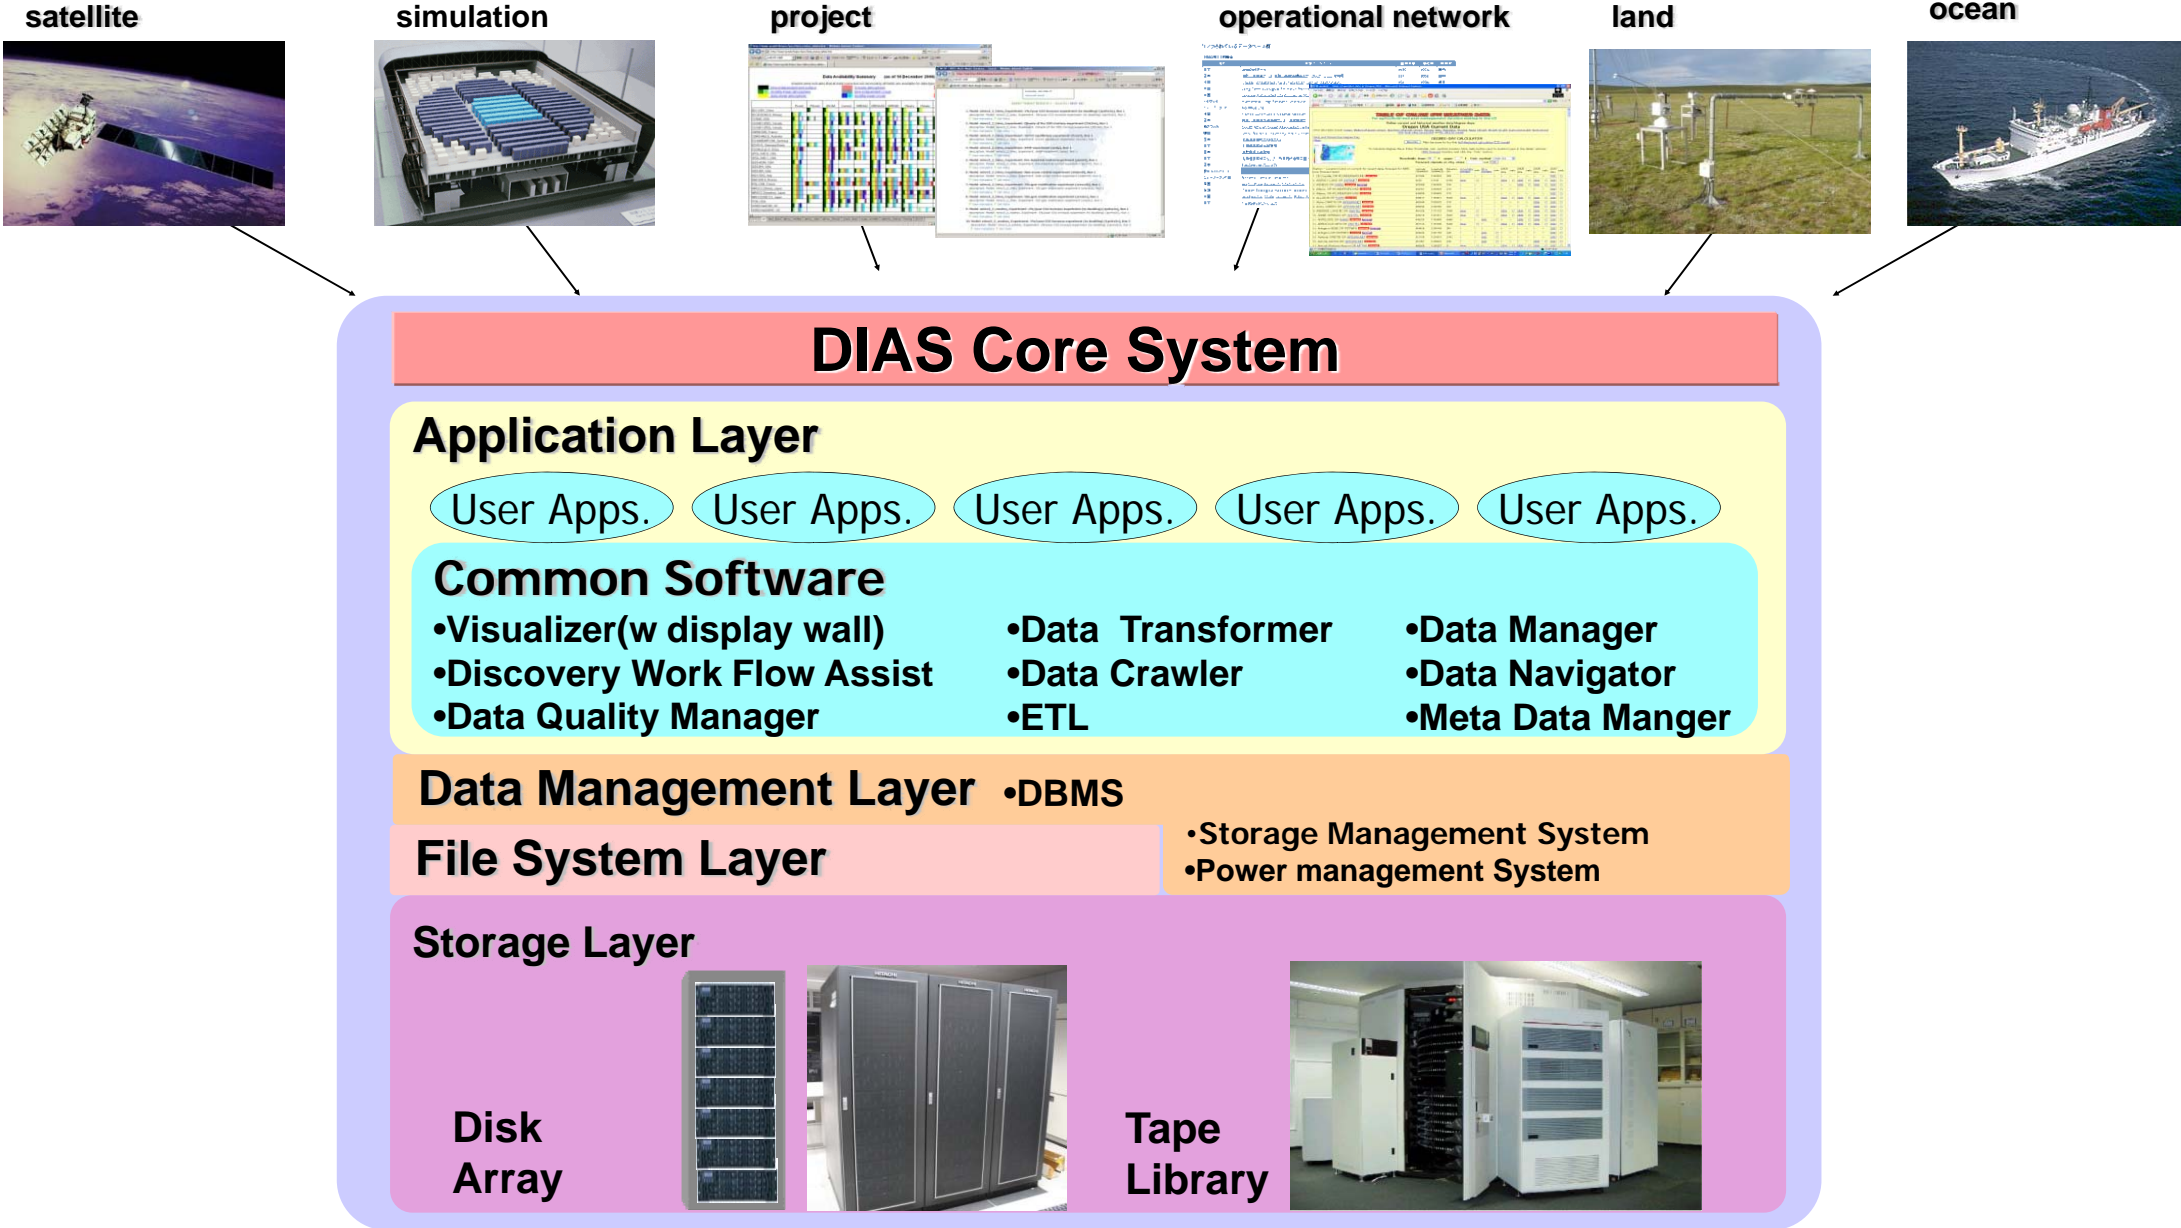

**THE Earth Observation Data Integration & Analysis System (DIAS) CENTER, University of Tokyo**  
Address: 7-3-1, Hongo, Bunkyo-ku, Tokyo 113-8654, Japan

# Data Integration on DIAS Core System

# Storage System Structure

## DIAS Storage System

- Connect to Dual 8-way Itanium2 Server
- 5-subsystem(Storage)
- Read 2.4GB/s/subsystem, total 12GB/s
- ≐ 1PB capacity HDD
- Advanced power management
  - Automatically turn off the power of idle part
  - Automatically turn on the power when accessed

# **New Installation around Petabyte-scale Storage at Institute of Industrial Science, U-Tokyo**

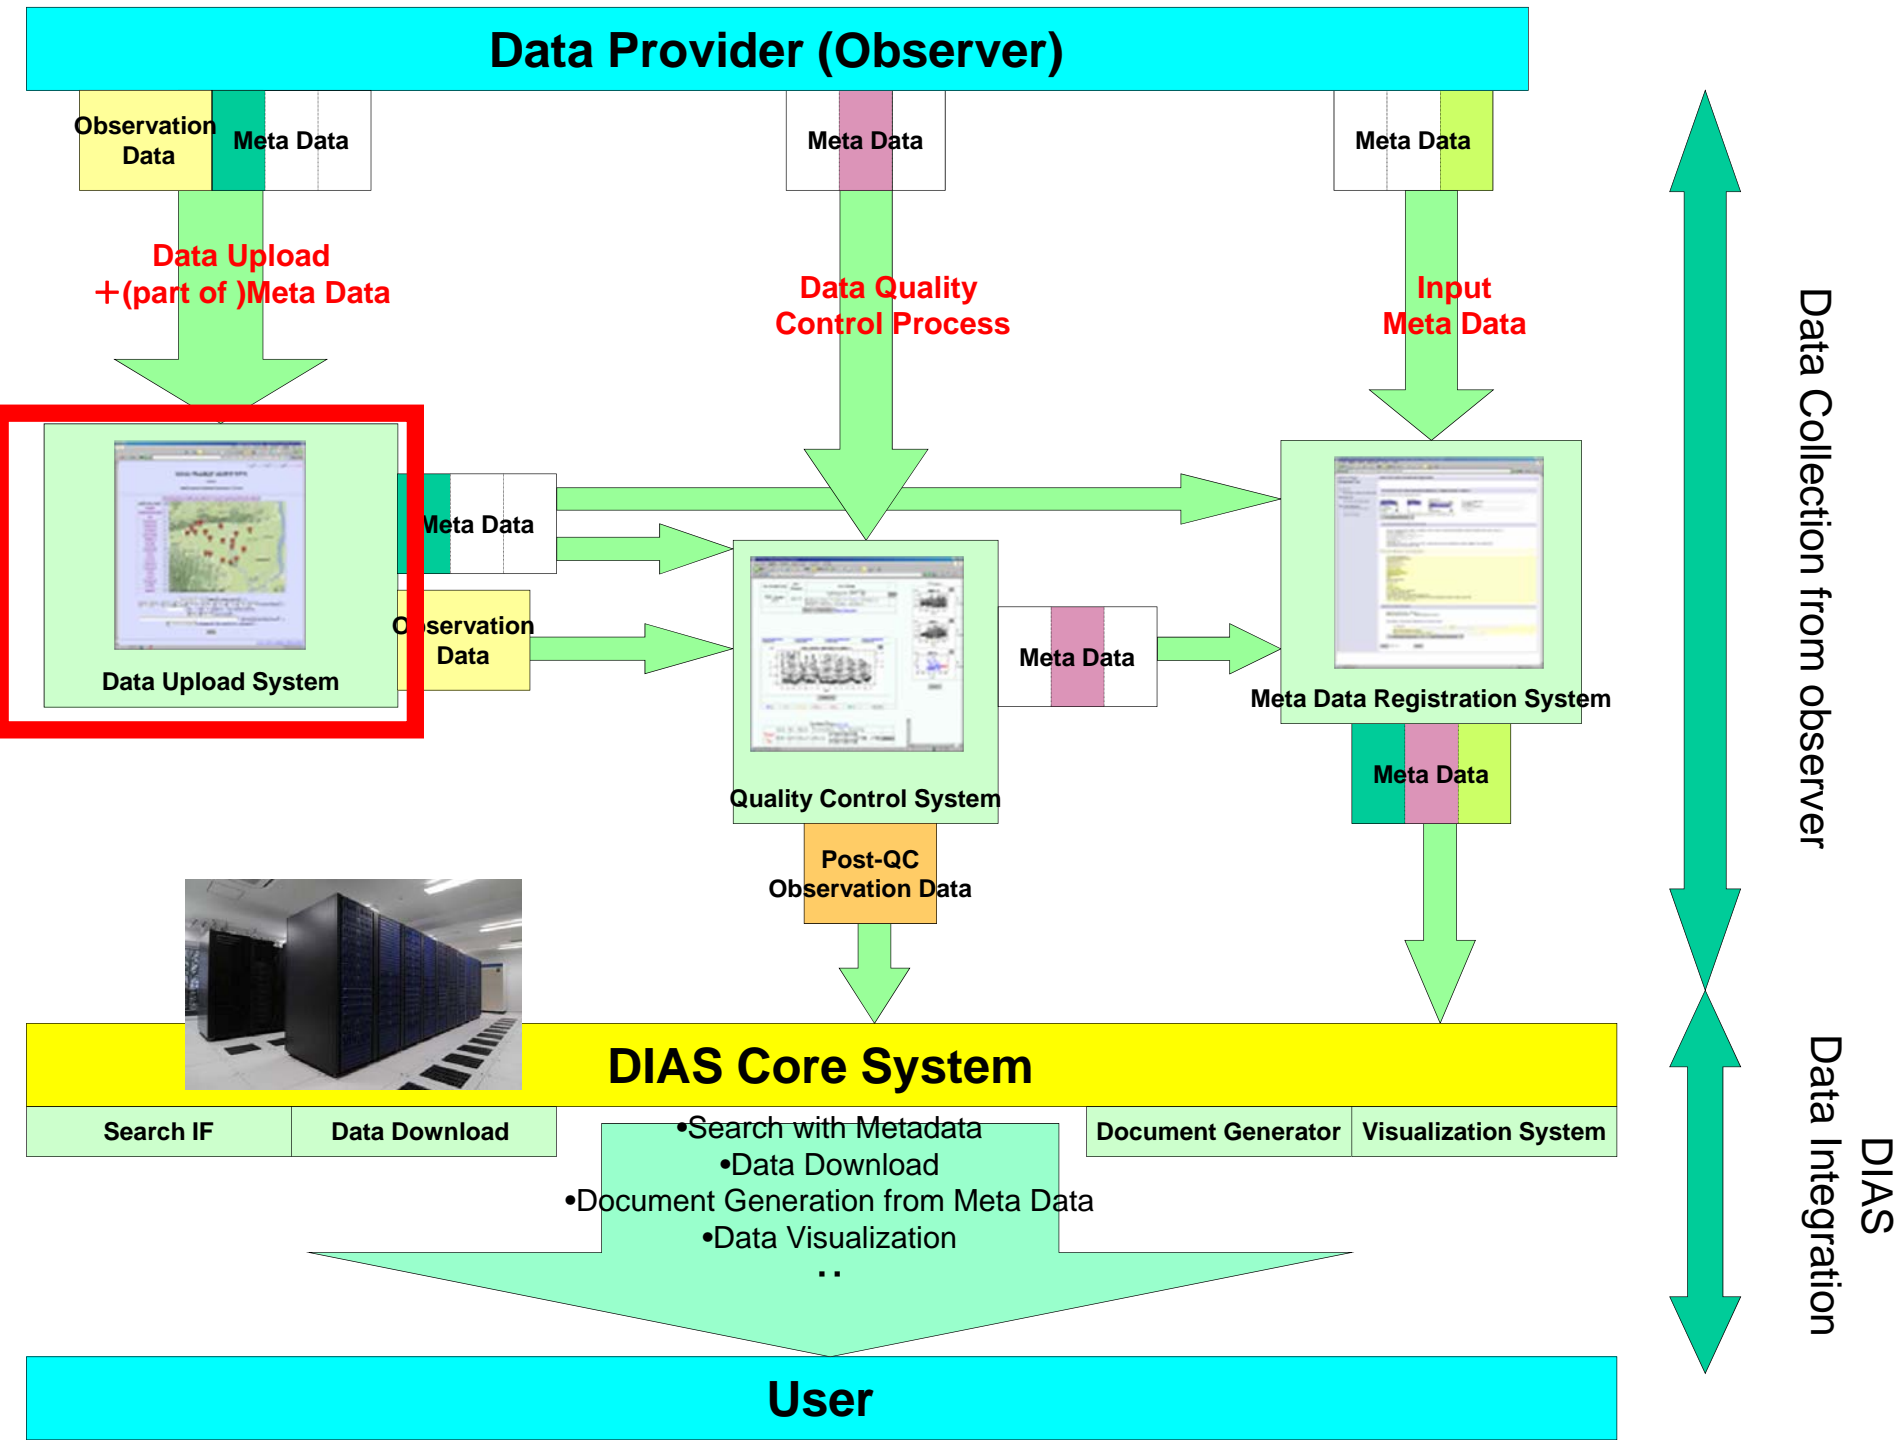

# Outline

1. **Outline of DIAS System**
2. **Introduction of Data Upload, Quality Control, and Meta-Data Registration System**
3. Introduction of CEOP Satellite Data Gateway system
4. Applications on DIAS System

# Observation Data Upload and DIAS Core System

# Observation Data **Upload** System

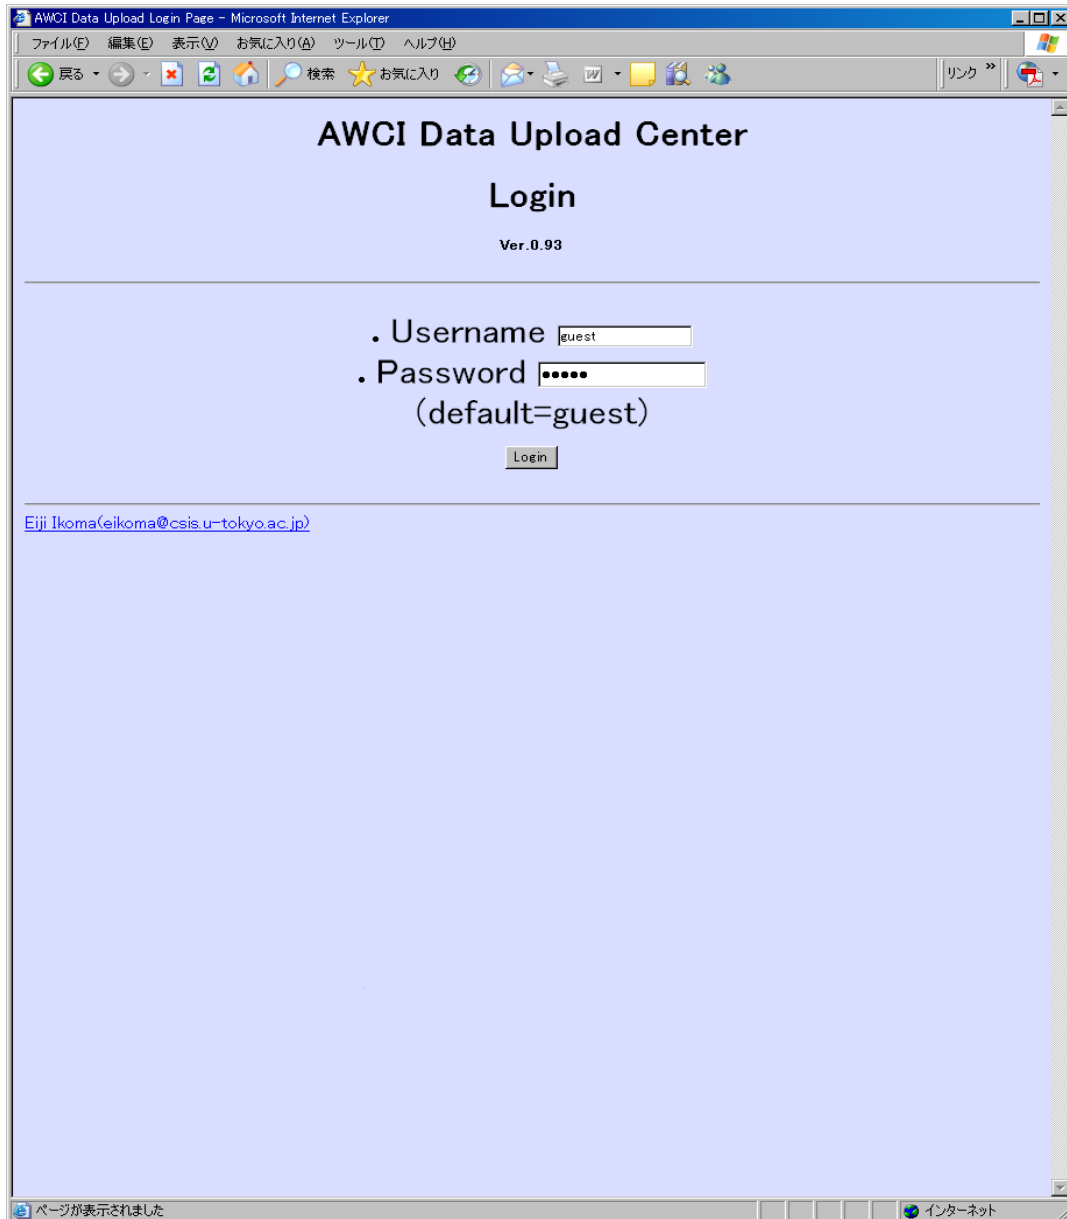

Eiji Ikoma

Katsunori Tamagawa, Hiroko Kinutani,  
Tetsu Ohta, Toshio Koike, Masaru Kitsuregawa

# Data Upload System

- Observers can upload observation data and input some Metadata on Web Interface consisted of 4 steps.
- Easy Operation and Quick Response.
- This system has some function which reduce the complicatedness of upload process

- Upload observation Data(File).
- Confirmation of metada inputted at STEP1,2.

# STEP 4

The screenshot shows a Microsoft Internet Explorer browser window at the URL `http://dias-dtk.iis.u-tokyo.ac.jp`. The page displays a confirmation message: "Your file J:\a\upload\BJ-051101-0.dat is uploaded as datafile.dat" and "2408227 Byte, 9059 lines". Below this, there is a "Thank you for your contribution" message and a "Back To Login Page" link. A sidebar on the left contains metadata for the "River Basin Name : Mj", "Observation Point: Baji", "Time Period: 2003/01/01", "Data Interval: 1hr", "Timezone: UTC+00:00", and "Description: Just Info.". A table lists parameters: Percolation, Water flux under the ground, Reservoir Water level, Reservoir Outflow, and Groundwater Table. An overlapping text editor window titled "BJ-051101-0.txt - メモ帳" shows the first and last three lines of the data file, which are numerical time-series data.

Step 1---->Step 2---->Step 3----> Step 4

Your file J:\a\upload\BJ-051101-0.dat is uploaded as datafile.dat

- Confirmation of
  - local path of uploaded file
  - contents of the file (first/last 3lines and all lines when you require)
  - All metadata inputted at STEP1,2,3

# After STEP 4

- Our system send the confirmation message to observer by e-mail.
- Inputted metadata are stored in our Upload system --- Observer can use at next time.
- Observation data is loaded to Quality Control System

# AWCI Data Upload and DIAS Core System

# Data Quality Control(QC) System

**Eiji Ikoma, Katsunori Tamagawa,**

Tetsu Ohta, Kenji Taniguchi,

Toshio Koike, Masaru Kitsuregawa

# Our QC System

- First version of our QC System was developed for CEOP Data in 2004.
- Ver.1(2004-2005) for → Ver.2(2005-2006)  
→ Ver.3(2007-)
- 13site(Ver.1)→ 25site(Ver.2)→ Ver.3
- We are running QC-V3 system for CEOP Observation Data.

# Features of our QC system

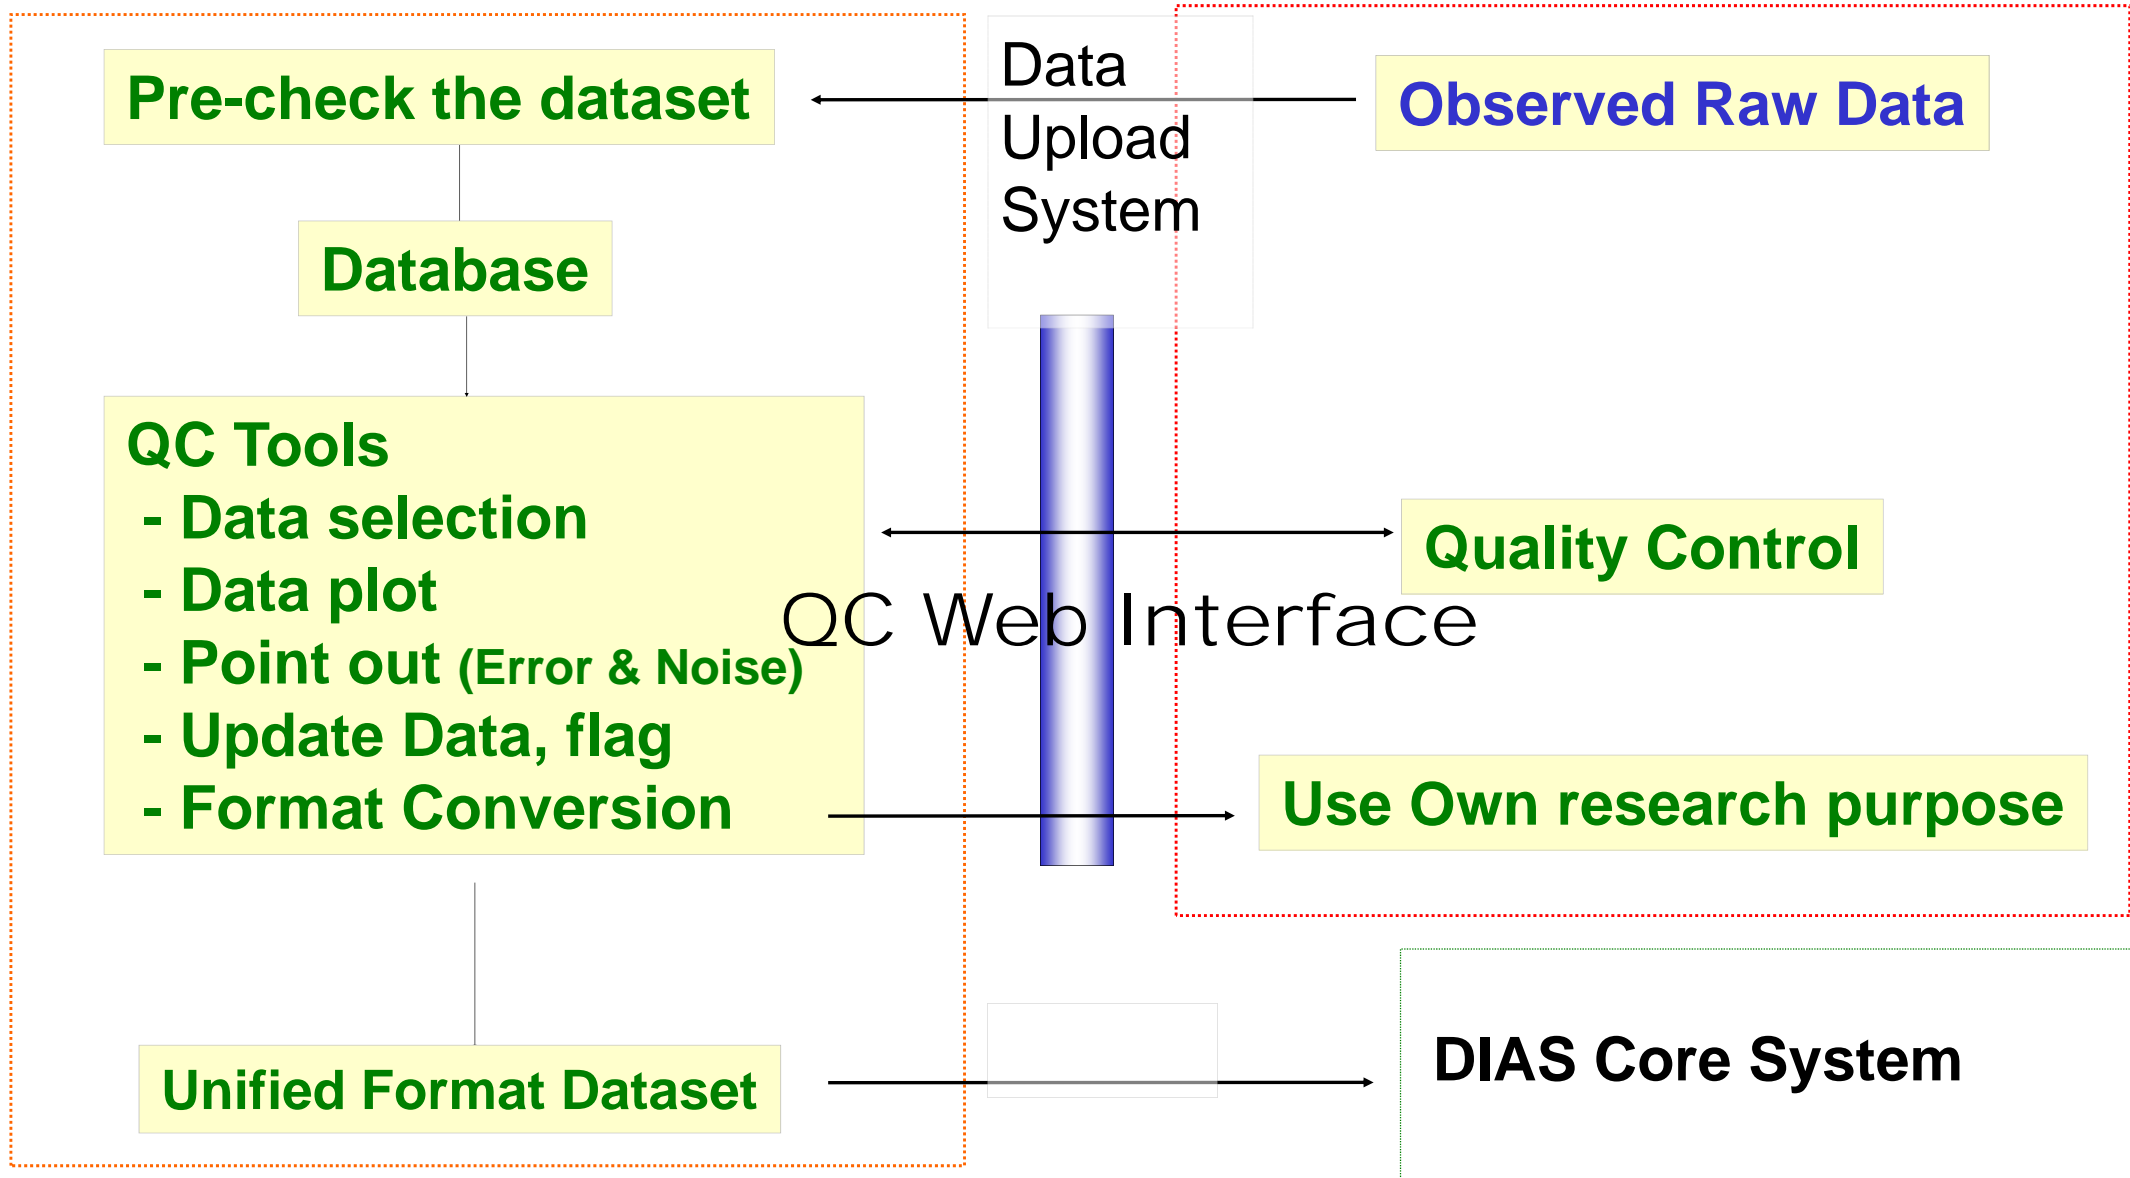

- Web-based UI ( required only Web browser)
- Easy-to-use and light operation
- Data management mechanism for each user authority
- Post-QC Data download support system
- Progress Management system for Data Manager

# AWCI Data Upload and DIAS Core System

# Observation Data Metadata Registration System

Hiroko Kinutani

Eiji Ikoma, Katsunori Tamagawa

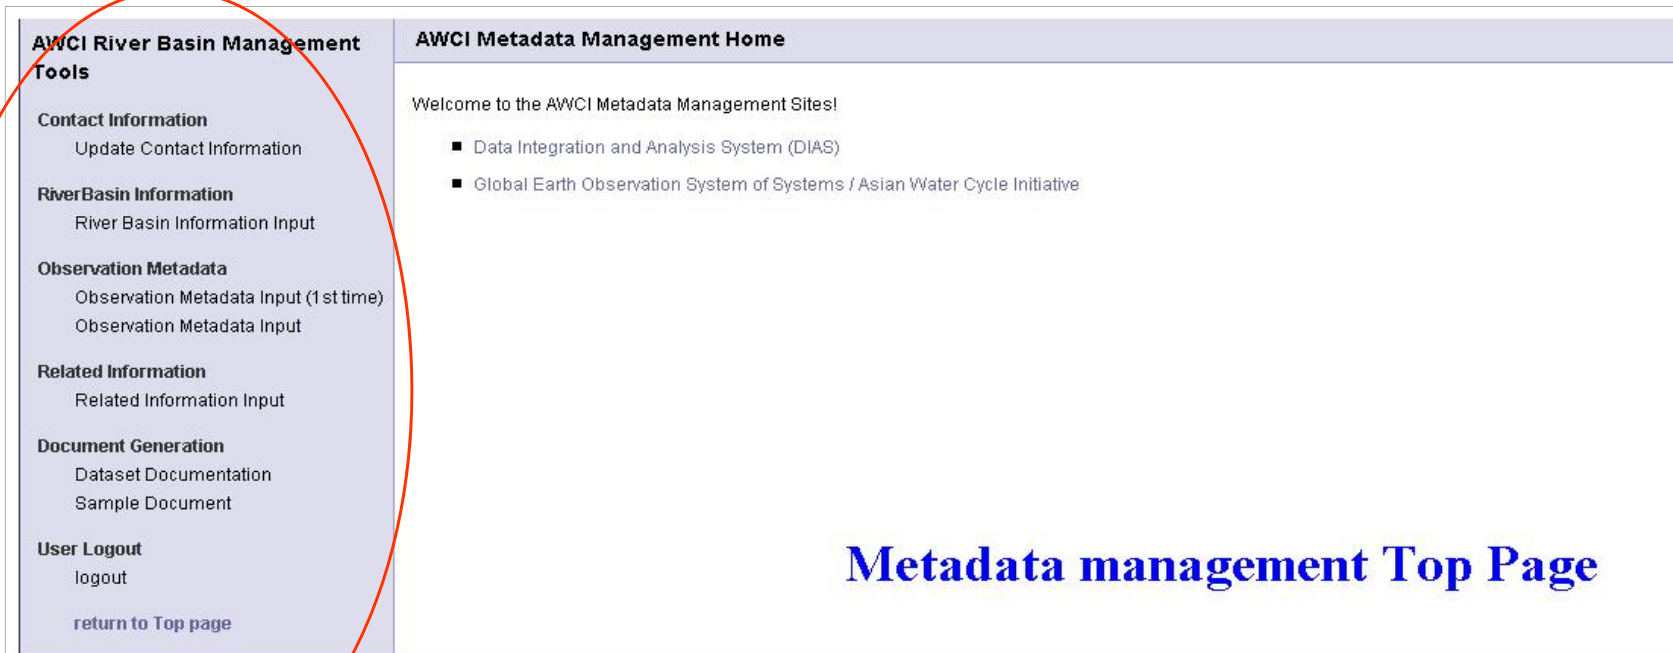

Tetsu Ohta, Masaru Kitsuregawa

# Metadata Input System

- Observers can input metadata information related to observation data on Web Interface.
- This metadata is defined as an extension of ISO19115, ISO19139 metadata standards.
- The operation on this system is much easier than other similar system.

Welcome to the AWCI Metadata Management Sites!

- Data Integration and Analysis System (DIAS)
- Global Earth Observation System of Systems / Asian Water Cycle Initiative

**Metadata management Top Page**

## Input Menu

- Contact Info.
- River Basin Description
- River Basin Observation metadata

# Contact Info. Input

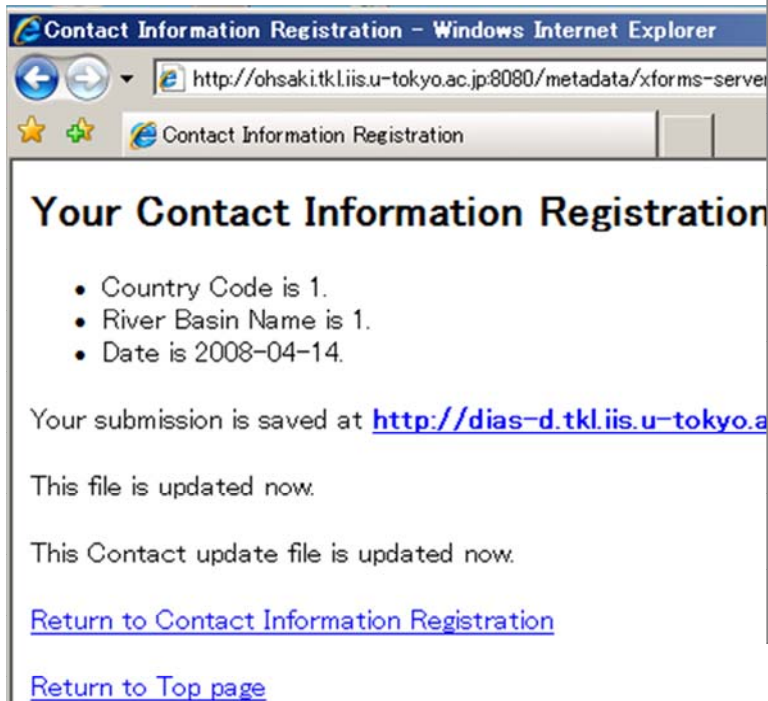

The screenshot displays the 'DIAS Contact Information Management ver.0.4' web application. The interface is divided into a left sidebar and a main content area. The sidebar contains navigation links for 'Contact Info', 'River Basin Info', and 'Observation Metadata'. The main content area is titled 'Contact Organization or Person Information' and contains several input sections:

- Contact Organization or Person Information:** Fields for Individual Name (Dr. Samarendra Karmakar), Organisation Name (Bangladesh Meteorological), Position Name (Director), Telephone (Voice) (+88 02 01 13043), and Telephone (Facsimile). Buttons for 'Add Telephone(Voice)', 'Delete Telephone(Voice)', 'Add Telephone(Facsimile)', and 'Delete Telephone(Facsimile)' are present.
- Address:** Fields for Delivery Point (Abhawa Bhaban), City (Agargaon), Administrative Area (Dhaka), Postal Code (1207), and Country (Bangladesh). An 'Add E-Mail' button is located next to the E-Mail Address field.
- E-Mail Address:** Field containing 'swcbmd@yahoo.com' with a 'Delete E-mail' button.
- Online Resource (Your Web Page URL):** Field containing 'http//'. Buttons for 'Insert CONTACT Item', 'Delete CONTACT Item', and 'Save Contact Information XML' are at the bottom.

- Contact Info. is often required to input.
- Name, Address, etc.
- Once input, Use many times

# Contact Info. submit

- Can view metadata as XML

Contact Information Registration - Windows Internet Explorer

**You can input Observation Data Metadata.**

- Your inputted metadata using **data upload system can be loaded** here
- **Default** Contact Info. , Longitude , Latitude can be loaded **automatically**.

# Observation metadata input(manually)

In this area, you will input about observation item.

**Usage History**

Currently, you may not to fill this information.

**Detail Description of the observed data**

**Observation Data Information**

observation id :

**Select Observation Data Category & Parameter.**

radiation  
temperature  
humidity  
wind  
barometric pressure  
evaporation  
precipitation  
soil moisture  
groundwater  
water content of plant  
rivers and lakes  
water quality  
The upper atmosphere  
The lower atmosphere  
fog  
cloud amount  
cloud base  
visibility  
carbon dioxide  
oxygen

Observation item Category :   Category : Air Temperature

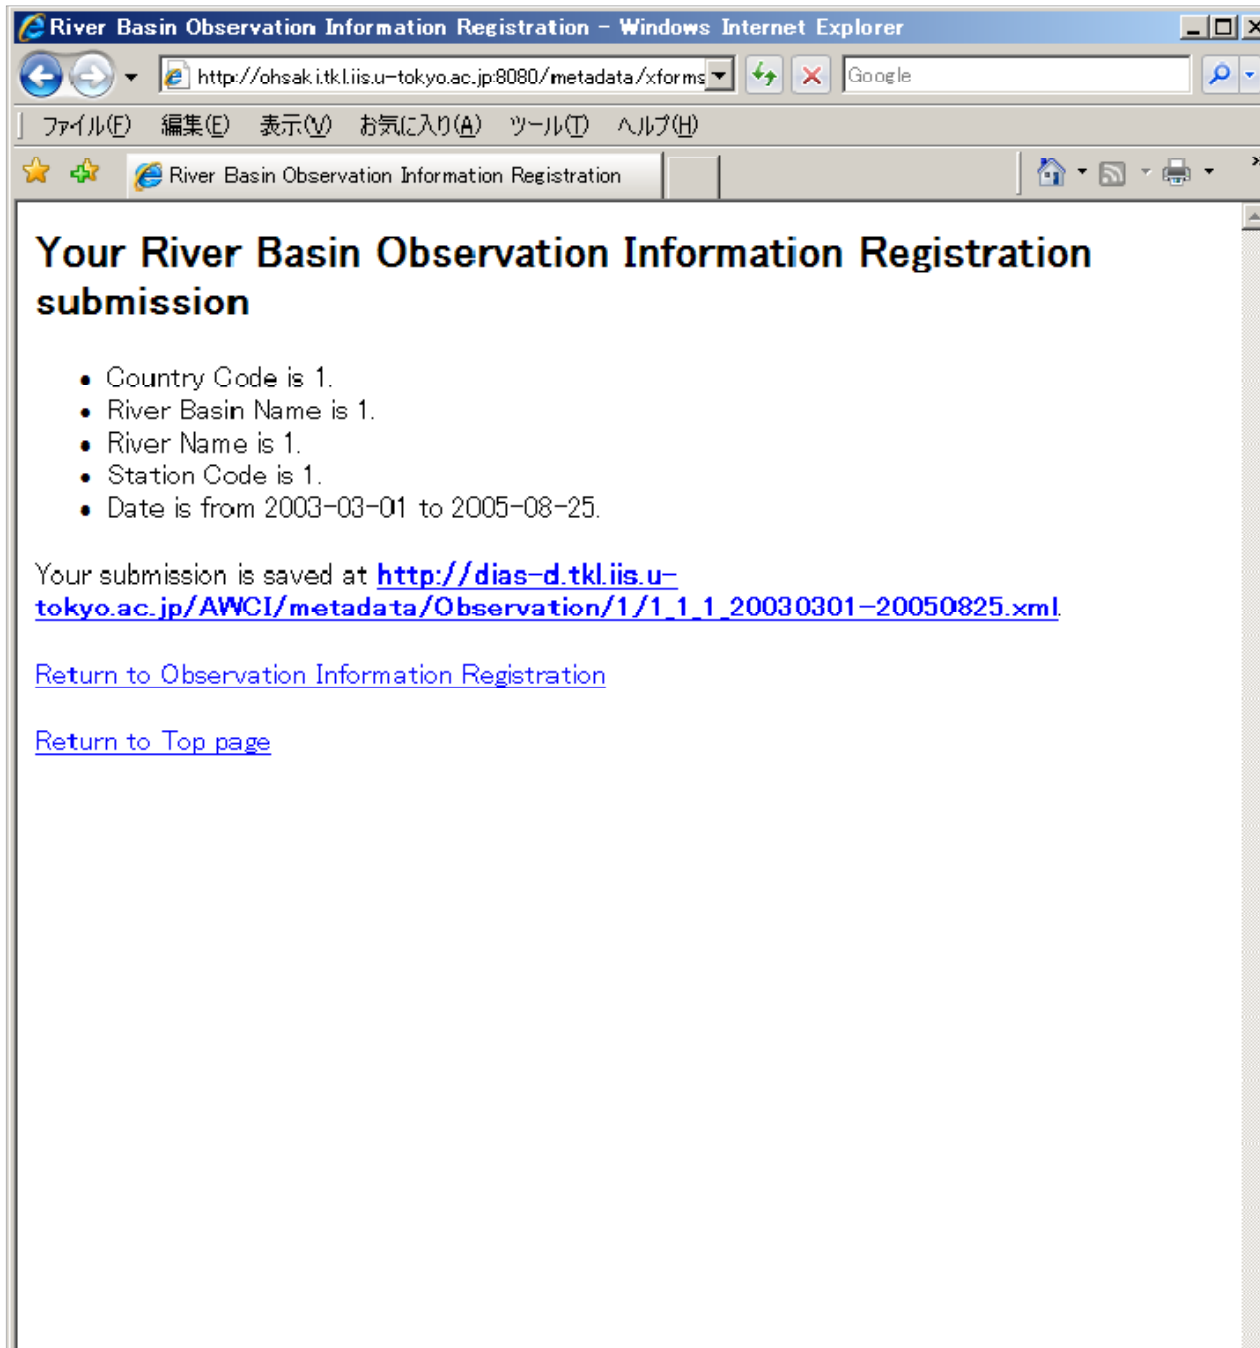

air temperature  
**soil temperature / earth temperature**  
soil temperature  
earth temperature  
surface temperature  
water temperature  
clinical temperature  
sensible temperature

Observation item Parameter :   Parameter :

Air Temperature

stem thermometer  
enclosed scale type thermometer  
double glass tube thermometer  
Rutherford type maximum and minimum thermometer  
Fuess type maximum and minimum thermometer  
bimetal thermometer  
bimetallic thermograph  
platinum resistance thermometer  
thermistor thermometer  
thermocouple thermometer  
quartz thermometer  
ultra-sonic thermometer

Observation item Instrument :   instrument parameter :

# Metadata Access

When the input process is finished, the metadata XML file is stored at the displayed URL.  
You can always see this file.

# Document Generation

## River Basin Observation Metadata Documentation 2008-09-05 (Page.1)

Please select your Country, Riverbasin, Observation Point.

Your Country :

- 1. Bangladesh
- 2. Bhutan
- 3. Cambodia
- 4. India
- 5. Indonesia
- 6. Japan
- 7. Korea
- 8. Lao PDR
- 9. Malaysia
- 10. Mongolia
- 11. Myanmar
- 12. Nepal
- 13. Pakistan
- 14. Philippines
- 15. Sri Lanka
- 16. Thailand
- 17. Uzbekistan
- 18. Vietnam
- 99. Japan-Tama

RiverBasin :  StationName :

**You can generate the dataset Documentation.**

when you specify of the observation point and dataset, you can generate the dataset Documentation.

## DATE OF THIS DOCUMENT

2006-10-17

## 1.0 DATASET OVERVIEW

### 1.1 Introduction

To clarify the energy and water characteristics of the basic meteorological data (Automatic Weather Station)

### 1.2 Time period covered by this dataset

Start : 2003-10-01  
End : 2004-08-14

### 1.3 Temporal characteristics of the data

Once a hour

### 1.4 Physical location of the observation site

Longitude : 92.17241  
Latitude : 31.25442

Elevation :  
Landuse : Bare land (with the  
Landcover : Bare land (with the  
Canopy height : Less than 5cm

### 1.5 Data source

### 1.6 WWW address reference

<http://srsr.dpri.kyoto-u.ac.jp/>

## 2.0 INSTRUMENTATION

### 2.1 Platform

The AWS of this site was constructed in summer 2002 as a part of the meso-scale triangle network

### 6.1.2 Quality issues

## 7.0 REFERENCE REQUIREMENTS

1. Character StringFree when agreed the CEOP data policy

## 8.0 REFERENCES

1. H. Ishikawa and GAME-Tibet Boundary Layer Group  
2001  
What has been known and what has not in GAME/Tibet BL observation .Proceedings of the Fifth International Study Conference on GEWEX in Asia and GAME, 691

## 9.0 Missing Data Periods

1. Snow depth there has sporadic noise in the data but the reason is still not be sure. Then the Quality control flag was put "D".
2. The incoming longwave values seem low during part of February 2004. Then the data flag "D" was put during this period. There was the same phenomenon in Amdo station in 1998 winter season. Then this ANNI stations phenomenon is probable. But we could not
3. Outgoing longwave sensor was trouble during EOP4. Then the regular sensor correction was not executed. But this effect is not so serious (several tens of W/m2) Then data flag was put "I". (Actually, the "I"+"G" flag will be better.)
4. No gap filling procedure was applied.
5. Snow Depth No missing data. Incoming Shortwave 2004/08/14 08:00 - 2004/08/14 23:00 (16)  
Outgoing Shortwave 2004/08/14 08:00 - 2004/08/14 23:00 (16) Incoming Longwave 2004/04/12 07:00 2004/08/14 05:00 - 2004/08/14 06:00 (2) 2004/08/14 08:00 - 2004/08/14 23:00 (16)  
Outgoing Longwave 2004/04/12 06:00 - 2004/04/12 13:00 (8) 2004/04/12 20:00 - 2004/04/12 22:00 (3) 2004/04/13 03:00 - 2004/04/13 05:00 (3) 2004/04/13 20:00 - 2004/04/13 21:00 (2) 2004/04/14 01:00 - 2004/04/14 03:00 (3) 2004/04/14 05:00 - 2004/04/14 13:00 (9) 2004/04/15 05:00 - 2004/04/15 12:00 (8) 2004/04/16 02:00 2004/04/16 04:00 - 2004/04/16 06:00 (3) 2004/08/14 05:00 - 2004/08/14 23:00 (18) Net Radiation 2004/04/12 05:00 - 2004/04/12 13:00 (8) 2004/04/12 20:00 - 2004/04/12 22:00 (3) 2004/04/13 03:00 - 2004/04/13 05:00 (3) 2004/04/13 20:00 - 2004/04/13 21:00 (2) 2004/04/14 01:00 - 2004/04/14 03:00 (3) 2004/04/14 05:00 - 2004/04/14 13:00 (9) 2004/04/15 05:00 - 2004/04/15 12:00 (8) 2004/04/16 02:00 2004/04/16 04:00 - 2004/04/16 06:00 (3) 2004/08/14 05:00 - 2004/08/14 23:00 (19) Skin Temperature 2004/08/14 08:00 - 2004/08/14 23:00 (16) Incoming PAR 2003/10/01 00:00 - 2004/08/14 23:00 (ALL) Outgoing PAR 2003/10/01 00:00 - 2004/08/14 23:00 (ALL)

# Summary

1. Outline of DIAS System - DIAS Core system which can co-exist of Energy Saving and Peta-scale Storage Space
2. Introduction of Data Upload, Meta-Data Registration, and Quality Control System -  
- all systems can support observers to regist data and information to DIAS with easy/user-friendly interface..

# Outline

1. Outline of DIAS System
  2. Introduction of Data Upload, Quality Control, and Meta-Data Registration System
- 
3. Introduction of CEOP Satellite Data Gateway system
  4. Applications on DIAS System
